

Software Product Description

PRODUCT NAME: DECserver 300 for MS-DOS, Version 2.0

SPD 34.87.00

DESCRIPTION

The DECserver 300 for MS-DOS® is a software package composed of the software image for the Digital DECserver 300 Terminal Server, and the software which enables a Personal Computer (AT class) to serve as a load host for the terminal server. This software package runs on Personal Computers running the MS-DOS Operating System and DECnet PCSA Client for DOS (PATHWORKS for DOS).

This product is used to downline load the DECserver 300 terminal server, with its operating image, over the server's Ethernet/802.3 connector.

Please refer to the DECserver 300 for VMS software product description for information relating to the terminal server (SPD 25.J1.xx).

Installation and Configuration

The software and image is first installed on an MS-DOS system (termed a load host). The terminal server software image is then downline-loaded from the load host.

HARDWARE REQUIREMENTS

Processors Supported (Load Host System)

Personal Computers: DECstation 316, 325

DEC EtherWORKS Turbo or LC Ethernet adapter

Other Hardware Required

Hard Disk drive

The software runs only with the DECserver 300 terminal server hardware available as follows:

- DSRVF-XX for use with 120V AC power supplies
- DSRVF-XX for use with 240V AC power supplies

Disk Space Requirements

Hard Disk space required for installation: 1,000,000 bytes

Hard Disk space required after installation: 600,000 bytes

These counts refer to the disk space required on the system disk. The sizes are approximate; actual sizes may vary depending on the user's system environment, configuration, and software options.

OPTIONAL HARDWARE

None

SOFTWARE REQUIREMENTS

For each MS-DOS System acting as a load host or dump receiver:

- MS-DOS Operating System V3.1, V3.3
- DECnet PCSA Client for DOS V3.0 (PATHWORKS for DOS)

OPTIONAL SOFTWARE

None

GROWTH CONSIDERATIONS

The minimum hardware/software requirements for future version of this product may be different from the requirements for the current version.

DISTRIBUTION MEDIA

For DOS systems, running MS-DOS, acting as a load host:

Disk: RX24 Floppy Diskette, RX31 Floppy Diskette

SOFTWARE LICENSING

The license to use the DECserver 300 for MS-DOS software image is included with the terminal server hardware. No additional license for this image is needed.

This software is furnished under the licensing provisions of Digital Equipment Corporation's Standard Terms and Conditions. For more information about Digital's licensing terms and policies, contact your local Digital office.

SOFTWARE PRODUCT SERVICES

A variety of service options are available. For more information, please contact your local Digital office.

SOFTWARE WARRANTY

The DECserver 300 for MS-DOS software is warranted for use only with supported DECserver 300 terminal server products supplied by Digital.

Warranty for this software product is provided by Digital with the purchase of a license for the product as defined in the Software Warranty Addendum of this SPD.

The above information is valid at the time of release. Please contact your local Digital office for the most up-to-date information.
