

Software Product Description

PRODUCT NAME: Compaq Enterprise Integration Packages Revision 3.3
SPD 64.75.07

DESCRIPTION

The Compaq Enterprise Integration Packages Release 3.3 documents Layered Product Support for OpenVMS Alpha Version 7.3-1.

Compaq Enterprise Integration Packages enhance and extend the capability of OpenVMS™ to smoothly integrate with an environment built upon Microsoft® Windows®. These packages provide users with licenses for layered software products that offer important, additional opportunities to meld popular and user-friendly Microsoft Windows environments with mission-critical OpenVMS systems, applications, and data. These packages include:

- Enterprise Integration Server for OpenVMS License Packages
- Enterprise Integration Client for Microsoft Windows License and Packages

The Enterprise Integration Packages provide OpenVMS, Windows XP Professional®, Windows 2000®, Microsoft Windows NT™, Microsoft Windows 98®, and Microsoft Windows 95® integration services using the listed software components:

- Management services

Compaq Archive Backup System for OpenVMS Management Tools (OMT)

Compaq Archive Backup System Windows NT Client

The management tools above will be shipped on the Software Products Library discs as subsets within the Compaq Archive Backup System software kit.

- Network transport and connectivity services
 - Compaq DECnet-Plus for OpenVMS Alpha (End System)
 - Compaq PATHWORKS 32
 - Compaq TCP/IP Services for OpenVMS
- File and print services
 - Compaq Advanced Server for OpenVMS
 - Compaq PATHWORKS™ for OpenVMS (Advanced Server)
 - DECprint™ Supervisor (DCPS) for OpenVMS Alpha Plus
 - DECprint™ Supervisor (DCPS) for OpenVMS Alpha Open
- Mail services
 - Compaq Office Server for OpenVMS
- Presentation services
 - Compaq DECwindows™ Motif®
- Internet services
 - Internet products are found on the OpenVMS e-Business Infrastructure CD-ROM, shipped with the operating system and with the Software Products Libraries. Necessary rights are included with the operating system. Separate licenses are not required.)

The licenses included in the Enterprise Integration Package give rights to the product versions shipping in the OpenVMS Alpha Software Products Library in the calendar quarter in which the EIP Package is dated and previous versions. Update licenses or update services may be purchased for use of later versions of any component.

The following tables list the specific components and included with each Enterprise Integration Package and the initial component version released to support OpenVMS Alpha Version 7.3-1.

- Table 1 lists the components of the EIP Server license package, delivered with many OpenVMS AlphaServers.
- Table 2 lists the components of the EIP Client for Microsoft Windows license package, which provides licenses for additional desktops.
- Table 3 adds EIP Server licenses to your existing NAS 200 license.

Compaq Office Server for OpenVMS	6.1	61.49	1	QM-5TB9*-**
Compaq Office Server Client Access License	6.1	61.49	2	QM-5TD9*-**
Compaq PATHWORKS for OpenVMS (Advanced Server) Client Access License	7.2	30.50	2	QM-5SUA*-**
Compaq PATHWORKS 32	7.2	56.53	3 ¹	QM-5LKA*-**

¹One PATHWORKS 32 license is provided for use with the OpenVMS Management Tools, while the other 2 are intended for general purpose use.

COMPONENTS

Many components of the Enterprise Integration Packages are products independently offered by Compaq. For complete descriptions of the functional content of each product, see the SPDs.

INSTALLATION

OpenVMS recommends that customers unfamiliar with the components of the Enterprise Integration Packages purchase Installation Services. These services provide installation of the software product by an experienced Compaq software specialist.

HARDWARE REQUIREMENTS FOR THE ENTERPRISE INTEGRATION SERVER

The Enterprise Integration Server supports all valid OpenVMS Alpha systems. For questions about the hardware requirements for individual component products, consult the *Hardware Requirements* sections of the component SPDs or the *Enterprise Integration Packages Installation Guide*.

Memory Requirements for the Enterprise Integration Server

The minimum supported memory for installation of the Enterprise Integration Server, with all components installed, is 64 MB.

The performance and memory usage of the Enterprise Integration Server and applications based on it are particularly sensitive to system configuration. Full configuration of all components may require memory in excess of the minimum previously quoted. Additional memory may also be required based on system loading and usage patterns of the components.

Disk Space Requirements for the Enterprise Integration Server

Installing the complete set of the Enterprise Integration Server components requires a minimum of 525 MB of disk space.

This count refers to the disk space required on the system disk. The size is approximate; actual size may vary depending on the customer's system environment, configuration, and software options. For example, actual disk space required may be less if the customer does not install some components or subcomponents. Customers may require additional disk space to create or expand component databases or to create user files.

SOFTWARE REQUIREMENTS FOR THE ENTERPRISE INTEGRATION SERVER

The software requirement for the Enterprise Integration Server is OpenVMS Alpha Version 7.3-1. Consult the individual SPDs to determine the software requirements for any specific product.

HARDWARE REQUIREMENTS FOR THE ENTERPRISE INTEGRATION CLIENT

The minimum hardware requirements for the Enterprise Integration Client are the minimum Microsoft operating system hardware requirements, with additional memory and disk resources for the PATHWORKS 32 component. See the Disk Space Requirements section in the PATHWORKS 32 SPD for more information.

See the component SPDs and installation guides for information about memory usage by components of the Enterprise Integration Client.

SOFTWARE REQUIREMENTS FOR THE ENTERPRISE INTEGRATION CLIENT

The software requirements for the Enterprise Integration Client are:

- Windows XP Professional
- Windows 2000
- Microsoft Windows 98
- Windows 95 with Service Pack 1
- Windows NT Version 4.0 with Service Pack 3.

GROWTH CONSIDERATIONS

The minimum hardware/software requirements for future versions of the Enterprise Integration Packages may be different from the requirements for the current version.

ORDERING INFORMATION

The Enterprise Integration License Package order numbers are as follows:

- QP-5LVA*-AC - Enterprise Integration Server for OpenVMS
- QP-5LWAA-Ax - Enterprise Integration Client for Microsoft Windows
- QP-03ZA*-AB - Enterprise Integration Extension License Package for Compaq NAS 200

NOTE:

* Denotes the System Class variant: Q=Enterprise, G=Departmental, E=Workgroup

x Denotes the license quantity variant: B=1, C=10, D=25, E=50, F=100, G=250, H=500, J=1000

DISTRIBUTION MEDIA FOR THE ASSOCIATED SOFTWARE

Media and documentation for all software associated with the Enterprise Integration Packages will be available as part of the OpenVMS Alpha Software Products Library. Many components will also be available as independent kits. The order number for the OpenVMS Alpha Software Products Library is QA-03XAA-H8.

Documentation

Online documentation is provided for all of the Enterprise Integration Packages products when these products are delivered with the OpenVMS Alpha Software Products Library.

When purchasing individual kits for the licensed products, please refer to the individual SPDs for information regarding the distribution of documentation.

SOFTWARE LICENSING

Licensed components of the Enterprise Integration Packages are furnished under the licensing provisions of Compaq. For more information about OpenVMS's licensing terms and policies, contact your local Compaq sales office, or find Compaq software licensing information on the World Wide Web at:

http://www.compaq.com/products/software/info/terms/swl_sld.html

Consult the appropriate SPD for specific license information regarding each component of the Enterprise Integration Packages.

SOFTWARE PRODUCT SERVICES

A variety of service options for each of the components within the Enterprise Integration Packages are available from Compaq.

SOFTWARE WARRANTY

This software is provided by Compaq with a 90 day conformance warranty in accordance with the HP warranty terms applicable to the license purchase.
