Install Modules

Step	Action
1	Turn the knurled end of the threaded rod (see the figure below) counter-clockwise all the way to its unlocked position before inserting the module.
2	Place the module's mounting tab **(1)** into the mounting slot on the right side of the DIGITAL MultiSwitch 900-4 chassis slot.
3	Pivot the module on the mounting tab, align the connectors, and slide the module onto the backplane connectors, being careful not to damage the connector pins.
4	Turn the knurled end of the threaded rod clockwise **(2)** and tighten with your fingers to the locked position.
