Modules that HUBwatch Manages

Manageable Modules

In This Appendix

This appendix lists the network modules that you can manage by using HUBwatch, followed by modules that you cannot manage with HUBwatch.

Modules That HUBwatch Manages

HUBwatch Version 4.1 can manage all 90-series modules and the following 900-series modules:

- DECbridge 900MX
- DECconcentrator 900MX, 900TH, and 900FH
- DECrepeaters 900FP, 900GM, and 900TM
- DECserver 900TM
- DECswitches 900EE and 900EF
- PEs switch 900TX
- RoamAbout Access Point
- DECserver 900GM
- DECrepeater 900TL
- DECrepeater 900FL
- DECrepeater 900SL
- DECmau 900TL
- DECmau 900TH
- PORTswitch 900TP
- PORTswitch 900CP
- PORTswitch 900FP

Modules Managed Through Other Applications Launched by HUBwatch

- DECpacketprobe 90. If you double click on the module, HUBwatch attempts to bring up Probewatch, if installed.
- DECpacketprobe 900RR. If you double click on the module, HUBwatch attempts to bring up Probewatch, if installed.
- RouteAbout Access EW. If you double click on the module, you start a telnet session.
