

Software Product Description

PRODUCT NAME: NetWorker BusinessSuite Module for SAP R/3 on Oracle,
Version 1.2

SPD 64.66.03

DESCRIPTION

NetWorker software for DIGITAL UNIX® systems provides high-performance backup, recovery, and archival services for multivendor systems in a networked TCP/IP environment. The addition of the NetWorker BusinessSuite Module for SAP R/3® on Oracle®, which is used in conjunction with SAP's backup interface (backint), provides reliable, high performance backup for mission-critical R/3 data. Together with the NetWorker storage management engine, the SAP R/3 interface delivers an integrated solution for protecting online SAP R/3 on Oracle databases across the enterprise.

NetWorker BusinessSuite Module for SAP R/3 on Oracle is a high-performance implementation of SAP's Backint specification that integrates SAP backup utilities with NetWorker's suite of storage management tools. The solution provides the simplified administration, hands-off automation, powerful media management and unsurpassed performance to efficiently manage large volumes of SAP R/3 data across the network. Using NetWorker's flexible scheduling, centralized operational procedures, and powerful automation, database administrators can deploy a corporate-wide SAP backup strategy that delivers high data integrity and reliability, dramatically reduces operational overhead, and ensures the highest data availability with minimal disruption to users.

Features

- Protects local and distributed R/3 data, including tables, tablespaces, redo logic, control and log files
- Handles raw partition and file system data
- Supports online/offline and full/incremental backup
- Optional cloning for extra security and easy offsite storage

- Backs up multiple tablespaces and database servers in parallel to one or more devices operating concurrently
- Optional client-side compression speeds backup performance
- Powerful media management
- Supports DIGITAL TruCluster™ environments

HARDWARE REQUIREMENTS

The NetWorker BusinessSuite Module for SAP R/3 on Oracle has no incremental hardware requirements. See the NetWorker for DIGITAL UNIX Software Product Description (SPD 50.98.xx) for hardware requirements for the NetWorker product.

DISK SPACE REQUIREMENTS

6 MB of disk space on the same drive as the NetWorker client software

OPTIONAL HARDWARE

None

SOFTWARE REQUIREMENTS

SAP R/3 Server System:

The NetWorker BusinessSuite Module for SAP R/3 on Oracle is installed on the SAP R/3 server system, and has the following software prerequisites:

- DIGITAL UNIX Operating System V4.0A or higher
- SAP R/3 V2.2, V3.0x, V3.1x, V4.0x

- NetWorker for DIGITAL UNIX V5.2 or higher or other NetWorker servers
- If a DIGITAL TruCluster environment, TruCluster V1.4A or higher

NetWorker Server System:

If the NetWorker server resides on a different system than the SAP R/3 server, the NetWorker server and the NetWorker client (the SAP R/3 server) system must be running NetWorker for DIGITAL UNIX V5.2 or higher, or other NetWorker servers.

OPTIONAL SOFTWARE

None

DOCUMENTATION

The following hardcopy document is available for this BusinessSuite Module:

- NetWorker BusinessSuite Module for SAP R/3 Installation Guide
- NetWorker BusinessSuite Module for SAP R/3 Administrator's Guide

SOFTWARE LICENSING

The NetWorker BusinessSuite Module for SAP R/3 on Oracle is licensed on a per database host basis. The NetWorker client system also requires a client connection license. All licenses are enabled and registered on the NetWorker server.

This software is furnished under the licensing provisions of Digital Equipment Corporation's Standard Terms and Conditions.

ASE/TruCluster Environments

In a DIGITAL TruCluster (ASE) environment, the cluster has three components: the serving system, the non-serving system, and the service(s). In this environment, install the database client license on the non-serving system to allow the Application Interface to continue to operate after an automatic failover.

The NetWorker server license and cluster client licenses are installed on the serving system. For automatic failover, you must also purchase and install NetWorker server license and cluster client licenses on the non-serving system.

License Management Facility Support

NetWorker licenses are managed using Legato's Enabler and Authorization Code technology.

For more information about DIGITAL's licensing terms and policies, contact your local DIGITAL office.

DISTRIBUTION MEDIA

This product is available on CD-ROM.

ORDERING INFORMATION

NetWorker BusinessSuite Module for SAP R/3 on Oracle

Software License: QL-5JGA*-AA

Media and Documentation: QA-5JGAA-H8

Documentation Only: QA-5JGAA-G2

* Denotes variant fields. For additional information on available licenses, services, and media, refer to the appropriate price book.
