PRODUCT NAME: **NonStop Payments Factory**   **SPD 70.80.00**
                    Pricing & Billing, Blueprint™

DESCRIPTION

Pricing & Billing Blueprint (PBB)

PBB is a pricing, costing and billing computer software product for wholesale and corporate banking services. It will do the following:

- Measure how "competitive pricing" should be defined

- Measure transaction costs

- Measure the value of pricing arrangements

- Measure internal economics of each product

- Price and cost services using TMA Service Codes

- Measure how individual services are being used

- Measure costs of providing services and their profitability

- Measure the value of product and service portfolios

- Measure value internally and to the market

- Measure the value of each customer relationship

- Analyze operational transactions

- Price by market, customer, account, service

- Price by customer account analysis grouping

- Create customer understandable services

September 20, 1999

- Generate customer, product and operational information

- Segment the customer base by similar characteristics

- Feed service details to finance control systems

CASE Tools

The CASE tools are an important part of our internal application development environment. They are used to produce our computer software products.

The CASE tools generate computer software code which contains our patented designs, such as our Relationship Management Engines. These stored procedures generate, compile, cache and execute SQL code for database navigation between entities and relationships for Enhanced Entity Relationship (EER) data models which are recorded in SQL database management systems. The following are key tools and features of this product:

Development

- Windows NT ADE

- Control monitor

- Data modeling

- Ad repository

- Erwin import export

- Screen painters

- Code generation

- Code design & customization

- Application template

Relationship management engine

- stored procedures

- Cardinality

- Mandatory head couplings

- Referential integrity

- Categories

- Recursive relationships

- Date effective relationships

- Data within relationships

- Database navigation

- Database load & refresh

INSTALLATION

Compaq requires that a customer's first purchase of this software product include Compaq Installation Services. These services provide for installation of the software product by an experienced Compaq Software Specialist.

For subsequent purchases of this product only experienced customers should attempt installation. Compaq recommends that all other customers purchase Compaq's Installation Services.

Before installation of the software, the customer must:

- Previously have installed all prerequisite software and hardware including terminals.

- Make available for a reasonable period of time, as mutually agreed by Compaq and the customer, all hardware, communications facilities and terminals that are to be used during installation.

- For verification of installation and connectivity in a multi-node network, designate and provide access to host that has previously been installed by Compaq.

HARDWARE AND SOFTWARE REQUIREMENTS

NonStop Payments Factory is Windows NT based only.

The H/W and S/W requirements for this and all components of the NonStop Payments Factory (NPF) product, due to its complex nature, are tightly controlled and spelled out in the configurations document (Bill of Materials) available at the NPF product web site: http://nsis.ogo.dec.com/fsip/wholesale/NPF/part_numbers.htm

GROWTH CONSIDERATIONS

The minimum hardware and software requirements for any future version of this product may be different from the requirements for the current version.

DISTRIBUTION MEDIA

After installation, integration and customization activities are completed, the NonStop Payments Factory software will be distributed via a CD–ROM to the end-customer.

YEAR 2000 READINESS STATEMENT

This product is Year 2000 Ready.

Year 2000 Ready is defined: "Year 2000 Ready" products are defined by Compaq as products capable of accurately processing, providing, and/or receiving date data from, into and between the twentieth and the twenty-first centuries, and the years 1999 and 2000, including leap year calculations, when used in accordance with the associated product documentation and provided

that all hardware, firmware and software used in combination with such products properly exchange accurate date data with the products.

For additional information visit the DIGITAL Brand area on Compaq's Year 2000 Ready web site located at http://ww1.digital.com/year2000/warranty.asp.

The NonStop Payments Factory Year 2000 Readiness Statement can be accessed on our web site: http://nsis.ogo.dec.com/fsip/wholesale/NPF.htm

SOFTWARE WARRANTY

This software is provided by Compaq with a 90 day conformance warranty in accordance with the Compaq warranty terms applicable to the license purchase.

ORDERING INFORMATION
