

January 2005

Dear HP Data Cartridge Server Component Customer:

Thank you for your recent purchase of Data Cartridge Server Component (DCSC) Version 3.3 software. DCSC is capable of operating in a mixed OpenVMS cluster environment. The kit you have just received includes OpenVMS I64, OpenVMS Alpha and OpenVMS VAX versions of DCSC V3.3.

DCSC was previously named Digital Cartridge Server Component.

The DCSC documentation set, which includes the *Installation Guide*, *System Manager's Guide*, *User's Guide*, and *Programmer's Reference Guide*, is unchanged since the release of DCSC V3.0.

DCSC V3.3 is supported on OpenVMS I64 Version 8.2, OpenVMS Alpha Versions 7.3-2 and 8.2, and OpenVMS VAX Version 7.3.

DCSC V3.3 contains the following enhancements:

- Support for OpenVMS I64 Version 8.2 on the Integrity server platform
- Bug fixes since the last release

Please refer to the release notes for more details.

Once again, thank you for your purchase of this product.
