OpenVMS V8.4 operating system. This update delivers the OpenVMS drivers required for support of SPC-4 disks.

For information about the full content delivered through VMS84I_UPDATE-V1000, please refer to the release notes.

Please check with your HP representative for details about the HDD and SSD models supported with OpenVMS.

Ordering and delivery

This DVD is included in all fresh purchases of the HP OpenVMS Version 8.4 for Integrity OE media kits BA322AA and BA324AA.

For those with an appropriate service contract, the DVD is also available with the December 2014 quarterly update for OpenVMS for Integrity servers. The DVD can be requested (or its ISO image downloaded) through the HP Support Center.

This DVD replaces and supersedes the "OpenVMS I64 V8.4 with Update 900" DVD (BA322-10057), which was released in December 2013.

This installation media is not applicable to OpenVMS for the Alpha server platform.
