

Software Product Description

PRODUCT NAME: applicationDEC 433MP System Exerciser

SPD 34.86.05

DESCRIPTION

The applicationDEC System Exerciser is a diagnostic tool designed to detect and isolate hardware faults to the field replaceable unit on applicationDEC systems. The program resides on a self-bootable, single 3.5-inch 1.44 Mbyte diskette. The program is totally self contained and made up of the operating system and test modules. Test modules test functionally distinguishable subsets of the system such as memory, disks, tapes, network devices, etc.

HARDWARE REQUIREMENTS

The System Exerciser runs on applicationDEC systems (applicationDEC 433MP (ISA), applicationDEC 433MP (EISA), and applicationDEC 400xP). It runs on any minimum system configuration which contains memory, a processor, a 3.5-inch floppy drive, and a monitor and keyboard.

OPTIONAL HARDWARE

The System Exerciser will run on any applicationDEC family member including fully loaded systems.

SOFTWARE REQUIREMENTS

None

DISTRIBUTION MEDIA

3.5-inch 1.44 Mbyte diskette
