

Software Product Description

PRODUCT NAME: MultiView™ Mascot, Version 3.1.1

SPD 42.64.02

DESCRIPTION

MultiView Mascot is a product developed by JSB Computer Systems Limited and sold under Digital Equipment Corporation's standard Terms and Conditions.

MultiView Mascot is a windowing environment for character-based terminals. The Mascot user-interface is compliant with the Motif® guidelines developed by the Open Software Foundation™. MultiView Mascot maximizes the limited resources of character-based terminals to enable the user to run up to six applications simultaneously.

The MultiView Mascot user-interface is an option to be used with applications running in a plain UNIX® environment without the need of adapting UNIX or the application(s).

The main parts of MultiView Mascot are:

- The UNIX manager, which enables non-technical users to perform complex UNIX system administration tasks. Since the UNIX manager is totally configurable, only those menu functions required by the individual user need to be configured onto that user's menu.
- The windowing environment with functions such as create, select, move, size, switch, minimize and maximize windows as well as copy and paste between windows on screen. Windows can be tiled, overlapped, or iconized, depending on the taste and needs of the user.
- The adaptable menu structure and hierarchy makes it possible to customize MultiView Mascot to the needs and demands of each individual user. For each user you can decide which application may be run, which window functionality may be used, and even change the style of the prompts and messages.
- The virtual terminal, which provides the link between terminal and application without modification of the application.

HARDWARE REQUIREMENTS

Processor and/or hardware configurations as specified in the System Support Addendum (SSA 42.64.02-x).

SOFTWARE REQUIREMENTS

- SCO™ UNIX System V™/386
- Base System Management

For easy configuration of terminals and printers included in the DECadvantage platform, Base System Management is required. Moreover, the updates on the SCO kernel included in Base System Management are required.

For consistent and integrated support by MultiView Mascot of all terminals, printers and keyboards included in the DECadvantage platform, the Peripheral Support Package, being part of Base System Management, is required.

Refer to the System Support Addendum (SSA 42.64.02-x) for availability and required versions of prerequisite /optional software.

ORDERING INFORMATION

16-user version: QB-01AAA-AC

32-user version: QB-01AAA-AD

64-user version: QB-01AAA-AE

128-user version: QB-01AAA-AF

All versions include media, license and documentation.

Release Notes: AA-PRXL*-TE

Getting Started Guide: AA-PRXM*-TE

User Guide: AA-PRXN*-TE

Configuration Guide: AA-PRXP*-TE

SOFTWARE LICENSING

This software is furnished under the licensing provisions of Digital Equipment Corporation's Standard Terms and Conditions. For more information about Digital's licensing terms and policies, contact your local Digital office.

This software is licensed for use on one computer only.

SOFTWARE PRODUCT SERVICES

A variety of service options are available from Digital. For more information, contact your local Digital office.

SOFTWARE WARRANTY

Warranty for this software product is provided by Digital with the purchase of a license for the product as defined in the Software Warranty Addendum of this SPD.

System Support Addendum

PRODUCT NAME: MultiView™ Mascot, Version 3.1.1

SSA 42.64.02-A

HARDWARE REQUIREMENTS

Processors Supported:

- applicationDEC 433MP
- applicationDEC 400xP
- DECpc 400ST
- DECpc 400MTE series

SOFTWARE REQUIREMENTS

- SCO™ UNIX® System V™/386 Release 3.2 Version 4
- Base System Management

For easy configuration of terminals and printers included in the DECadvantage platform, Base System Management is required. Moreover, the updates on the SCO kernel, included in Base System Management, are required.

For consistent and integrated support by MultiView Mascot of all terminals, printers and keyboards included in the DECadvantage platform, the Peripheral Support Package, part of Base System Management, is required.

Unsupported:

- SCO ODT

GROWTH CONSIDERATIONS

The minimum hardware/software requirements for any future version of this product may be different from the requirements for the current version.

DISTRIBUTION MEDIA

The software is distributed on high-density, 3.5-inch diskette.
