Software Product Description

PRODUCT NAME: DECtouch, Version 1.2   **SPD 43.10.00**

DESCRIPTION

The DECtouch product enables users to interact with their computer applications by simply touching the screen where the information is displayed.   Since DECtouch allows users to follow their natural instinct to point, it provides an intuitive and easy-to-use inter-face for many computer applications. DECtouch allows the user to enable touchscreen functionality on any PC monitor from 12-inch through 19-inch that weighs less than 90 pounds (U.S.). This is a user-installable product that does not alter the monitor in any way.

Features

Calibration

DECtouch must be calibrated when it is installed and then any time that the monitor position, in respect to DECtouch, changes. The calibration procedure is used to inform DECtouch where the plane of the monitor screen exists.

Registration

The Registration program is the procedure for map-ping a portion of the monitor plane into the application's screen area.
