

Software Product Description

PRODUCT NAME: Compaq Office Server MAPI Driver Version 7.1

SPD: 61.43.05

DESCRIPTION

The Compaq™ Office Server MAPI Driver V7.1 enables users of Compaq Office Server equipped with Outlook clients to fully participate in messaging interchange with Microsoft Exchange Server users. This means that users can continue to access their high reliability OpenVMS corporate messaging service and historic document repository.

The driver installs on Windows 98 PCs, Windows 2000 and Windows XP Intel Server and Workstation and communicates with Compaq Office Server Version V5.0, V6.0, V6.1 and ALL-IN-1 Office Server Version 3.2 over Internet Protocol (IP). No changes to the servers are required.

Functionality supported includes:

Messaging Interoperability

- In a mixed messaging server environment the Outlook and Exchange client user may define which server is their primary server. With Office Server designated as the primary Message Store, all mail will enter just one INBOX for processing. The user has look-up access to the full range of directories supported by both servers including the Exchange Global Address List. Upon sending, replying and forwarding mail the messaging transport utilised includes Exchange Server and MAPI 1 Service Providers for Internet. Messages with attachments and documents may be dragged and dropped from one environment to the other retaining header information where applicable.
- With Exchange Server designated as the primary Message Store, all mail will enter the Exchange INBOX. The full range of functionality as described

above is available and mail received from the ALL-IN-1 and Office Server environment can be fully processed including replying and forwarding of messages utilising the OpenVMS based messaging backbone and directory services.

- User's may nominate a colleague to process their mail in their absence by granting access to their INBOX. One secretary can process the mail of multiple managers if required.
- The product supports Unattended Installation and utilises InstallShield.

Mail Processing

- Create message
- Send message
- Read message
- Reply to message
- Forward message
- Refile message
- Copy message
- Delete message
- Auto-forward of new mail from Office Server INBOX
- Modify and add to an address list on a message
- Messages of the special Outlook message types "Sticky Note", "Tasks" and "Contacts" may now be created
- New mail notification
- Create and Delete an Auto-Reply message for users that nominate Office Server as their primary message store

- ALL-IN-1 Time Management notifications are left untouched enabling processing from VT or terminal emulation

Directory Access

- Support of Exchange Server, X.400, smtp, Message Router, VMSmail™ and local style addressing
- Optional display of the simple Internet address embedded in an X.400 address
- Look up addresses in:
 - Exchange Global Address List
 - Outlook Address Book
 - Personal Address Book
 - Office Server/ALL-IN-1 profile
 - Network
 - Nicknames
 - Personal distribution lists
 - System distribution lists including "Subscribers"
 - Add Office Server Groups to recipient lists
 - Compaq Enterprise Directory (wka X.500 Directory Service)
 - LDAP directory servers (not valid for ALL-IN-1 Version 3.2)
 - DDS
- Initiate address lookups on full name or partial name
- Improved handling of messages from mailing lists
- Optionally utilize Exchange client address templates

File Cabinet Operations

- View the Office Server and ALL-IN-1 V3.2 file cabinets as Nested Folders with full manipulation of messages and documents within
- Support of persistently empty folders
- Customize name of Office Server file cabinet
- Add a drawer
- Remove a drawer
- Manage groups for sharing drawers
- Manage shared drawers
- Browse user's Office Server drawers
- Browse shared drawers
- Create Office Server folder
- Add Office Server folder
- Delete Office Server folder

- Drag and drop documents and messages between folders
- Warning given on attempting illegal operation
- Drag and drop between Office Server folders with Outlook and Exchange client

Message and Document Handling

- Find documents across multiple servers using extensive search criteria
- View WPS-PLUS™ messages or attachments
- View WordPerfect® messages or attachments (not prior to WordPerfect Version 4.2 release)
- Attach a document of any type to a mail message from the Office Server File Cabinet, local file cabinet (e.g., C: drive) or remote cabinet (e.g., network drive)
- From a mail message, file copies of attached documents to a local file cabinet, remote file cabinet or Office Server folder
- Support for document reservations
- Honor access rights to modify documents

Miscellaneous Features

- More extensive On-Line Help
- The Change Password option now provides support for those customers who are using the Single Signon features provided by OpenVMS V7.2 and later, or by the Advanced Server for OpenVMS on previous versions of OpenVMS to permit use of a single username and password across OpenVMS and Microsoft Windows Network Domains.
- Ability to archive & restore documents in the Office Server Message Store

VALIDATED MAIL CLIENTS

- Outlook 2000: Windows 98 and Windows 2000 Professional
- Outlook 2002: Windows 98, Windows 2000 Professional and Windows XP Professional

* The following Outlook features are not supported:

- Extended properties and TNEF
- Calendar options
- Automatic archiving
- Deferred send
- Flagging documents
- Special views

VALIDATED MAIL-ENABLED APPLICATIONS

- Office 2000, Office XP

Note: The above mail clients and applications have been certified with this release of the product. The behavior of other MAPI 1 compliant clients and applications has not been documented.

OPERATIONAL REQUIREMENTS

The Driver communicates:

- With Compaq Office Server for OpenVMS Version 6.1, 6.0 and V5.0 (SPD:61.49.XX)
- With ALL-IN-1 Office Server for OpenVMS Version 3.2 (SPD:27.30.10)
- Over TCP/IP networks based on Multinet®, Pathway, TCPware or Compaq TCP/IP Services
- Using a valid WINSOCK implementation of TCP/IP

OPERATIONAL RESTRICTIONS

ALL-IN-1 versions prior to Version 3.2 are not supported.

DIGITAL Alpha PCs and Alpha workstations are not supported.

INSTALLATION

The driver installs on Windows 98, Windows 2000 and Windows XP Intel workstations from CD-ROM, network drive, Compaq network, or an intranet.

DOCUMENTATION

Online documentation is supplied on the CD-ROM.

SOFTWARE LICENSING

With ALL-IN-1 Version 3.2 server systems licensed by traditional Capacity or User licensing, a MAPI driver license must be purchased for each and every PC client installation, regardless of how the software was obtained.

Licenses are available in multiple quantities (see below) to minimize administrative overhead. At all times, the number of MAPI Driver licenses at a customer site must equal or exceed the number of MAPI driver PC client installations on that site. In addition, individual user names must be present in the ALL-IN-1 user profile.

With COMPAQ Office Server systems licensed by Client Access Licenses (CALs), no MAPI driver licenses are required, as the rights to each MAPI driver Version 7.1 installation is granted by each CAL. Every user/subscriber in the Office Server profile must have an equivalent Office Server CAL.

This software is furnished under the licensing provisions of Compaq Computer Corporation Standard Terms and Conditions for PC products. For more information about COMPAQ's licensing terms and policies, contact your local COMPAQ office or COMPAQ Partner. This software is provided by COMPAQ with a 90 day conformance warranty in accordance with the COMPAQ warranty terms applicable to the license purchase.

HARDWARE REQUIREMENTS**Windows 98, Windows 2000 and Windows XP**

Minimum Configuration: Intel Pentium processor clocked at 333MHz with 128 MB memory and no less than 42 MB disk space.
