# DIGITAL Server Solutions for Microsoft Small Business Server

ENTERPRISE EXCELLENCE SOLUTIONS

Now your small business can receive enterprise-class treatment.

DIGITAL™ and Microsoft® have joined forces to bring you everything you need to run your business—a powerful DIGITAL Server system with a fully integrated application suite to manage office tasks and communication among your employees, customers, and business partners. It's easy to set up, use, and manage—without an IT specialist. Microsoft BackOffice® Small Business Server (SBS) runs on three DIGITAL Server systems that have been tested to meet your growing business needs.

## FEATURES

### Designed for growing small businesses

- Send and receive E-mail.
- Share data with employees, customers, and business partners.
- Connect to the Internet.
- Send and receive fax messages from desktop PCs.

- Share printers and modems.

### Performance and expandability

- DIGITAL Server 500—233MHz Pentium® with MMX™, for budget-minded small businesses.
- DIGITAL Server 1200/1205—233MHz or 266MHz Pentium II, for production application users.

- DIGITAL Server 3200/3205—266MHz or 300MHz Pentium II, for fast-growing companies that need utmost expandability and application availability.

### Distributor packages to suit local business conditions

- Modems to meet local government requirements.

- Models with options for growing businesses.

### Reliability and availability

- Three-year, on-site, next-business-day warranty.
- Enterprise-class service from DIGITAL professionals.

## SBS—everything you need to run a small business

Microsoft® Small Business Server (SBS), a subset of the popular BackOffice® software for large- and medium-sized enterprises, is designed for businesses with fewer than 100 employees. It's ideal for professional offices including doctors, lawyers, real estate agents, stock brokerages, architects, and small retail establishments.

SBS on a DIGITAL™ Server system offers simplified installation and no MIS involvement. It includes virtually everything a growing business needs, including:

- Microsoft Windows NT® Server 4.0—one of the world's most popular operating systems
  - Microsoft Internet Information Server—a platform for connecting to the Internet and building Web applications
  - Microsoft SQL Server—a powerful relational database program for business applications
  - Microsoft Exchange Server with Microsoft Outlook—applications for electronic mail, discussion groups, list servers, and other groupware features
  - Microsoft FAX Server—a centrally-managed application for sending and receiving faxes from desktop PCs
  - Internet Connection Wizard—a program that helps you locate and sign-on to Internet Service Providers
  - Microsoft Front Page 97—a tool to create and manage professional Web sites
  - Microsoft Proxy Server—a program that improves the speed and security of Internet access for desktop PCs
  - Modem Sharing Server—an application that makes it easy to share modems from central locations
  - Integrated Server Setup—a tool that installs all server components after you answer a few simple questions
  - Setup Computer Wizard—a tool that provides a simple, quick way to add new PCs to your network
  - Small Business Server Console—a server management tool in a wizard-style format
- Licenses are available in five-user increments, up to a total of 25 users.

## A choice of three DIGITAL Server systems

Microsoft Small Business Server runs at peak performance on the following DIGITAL Server systems:

- DIGITAL Server 500—for budget-minded small businesses
- DIGITAL Server 1200/1205—for production application users
- The DIGITAL Server 3200/3205—for the fastest-growing small companies that require more expandability and high availability

Your local DIGITAL distributor can easily upgrade and expand these systems to satisfy your particular needs.

## DIGITAL options/peripherals

- Additional memory
- Additional storage
- Network adapter cards
- Fax/modem cards
- Tape backup devices

## DIGITAL and third-party software

No special DIGITAL software is required. However, your local distributor may include extra software designed to meet your special needs. You may implement SBS in conjunction with installing or upgrading a local area network (LAN).

## DIGITAL Services

DIGITAL Services support Windows NT and Microsoft BackOffice applications. DIGITAL Servers come with a three-year, on-site, next-business-day warranty that may be upgraded to specific hourly response times to meet your needs.
