

COMP340-08B Reasoning About Programs

1. Propositional Logic

Robi Malik

DEPARTMENT OF COMPUTER SCIENCE
TARI ROROHIKO

Assessment

Internal Assessment: 50%

- 11 assignments handed out in Thursday lectures, due Wednesday 17:00 the following week.
- Assignments 1–5 and 7–11 are worth 1/12 of internal assessment.
- Assignment 6 is worth 2/12 of internal assessment.

Final Exam: 50%

Logic

*‘Contrariwise,’ continued Tweedledee,
‘If it was so, it might be; and if it were
so, it would be: but as it isn’t, it ain’t.
That’s logic.’*

— Lewis Carroll

Why Study Logic?

Rules of logic used in many areas of computer science, for example:

- Programming (e.g. && and || in C)
- Circuit design
- Artificial intelligence
- Proving the correctness of a program

© THE UNIVERSITY OF WAIKATO · TE WHARE WANANGA O WAIKATO · COMP340-08B Lecture 1 · Slide 7

Logic Symbols

Euclidean Algorithm

```
public int gcd(int x, int y)
{
    if (y == 0) {
        return x;
    } else {
        return gcd(y, x % y);
    }
}
```

COMP340-08B Prerequisites

- **COMP103**
Introduction to Computer Science I
- **COMP153**
Practical Programming
- **COMP140**
Foundations of Computer Science
- **COMP235**
Logic and Computation
- **COMP240**
Mathematical Foundations of Computer Science

© THE UNIVERSITY OF WAIKATO · TE WHARE WANANGA O WAIKATO · COMP340-08B Lecture 1 · Slide 9

On the Nature of Implication

Let:

p = "The moon is made of green cheese."

q = "The lecturer is a pink elephant."

What is the truth value of ...

$$p \rightarrow q$$

© THE UNIVERSITY OF WAIKATO · TE WHARE WANANGA O WAIKATO · COMP340-08B Lecture 1 · Slide 12

Logic Symbols

\leftrightarrow \oplus

© THE UNIVERSITY OF WAIKATO · TE WHARE WANANGA O WAIKATO · COMP340-08B Lecture 1 · Slide 13

Propositional vs. Predicate Logic

Propositional Logic

- Only **propositions** and **connectives**.

$\neg \quad \wedge \quad \vee \quad \rightarrow \quad \leftrightarrow \quad \oplus$

Predicate Logic

- Adds **variables** and **quantifiers**.

$\forall \quad \exists$

© THE UNIVERSITY OF WAIKATO · TE WHARE WANANGA O WAIKATO · COMP340-08B Lecture 1 · Slide 16

Propositional Connectives

Negation	$\neg p$	"not p "
Conjunction	$p \wedge q$	" p and q "
Disjunction	$p \vee q$	" p or q "
Exclusive Or	$p \oplus q$	"either p or q "
Implication	$p \rightarrow q$	"if p then q "
Equivalence	$p \leftrightarrow q$	" p if and only if q "

© THE UNIVERSITY OF WAIKATO · TE WHARE WANANGA O WAIKATO · COMP340-08B Lecture 1 · Slide 14

Logic Concepts

- Formula
- Proof
- Model
- Induction
- Tautology
- Deduction
- De Morgan's Law
- Soundness
- Karnaugh Map
- Completeness
- Logical Consequence
- Proposition

© THE UNIVERSITY OF WAIKATO · TE WHARE WANANGA O WAIKATO · COMP340-08B Lecture 1 · Slide 17

Logic Symbols

\forall \exists

© THE UNIVERSITY OF WAIKATO · TE WHARE WANANGA O WAIKATO · COMP340-08B Lecture 1 · Slide 15

What is a Proposition?

Definition:
A **proposition** is a statement that is either true or false.

Example:
"Hamilton is south of Auckland."

© THE UNIVERSITY OF WAIKATO · TE WHARE WANANGA O WAIKATO · COMP340-08B Lecture 1 · Slide 18

Propositional Variables

- **Propositional variables** are the basic components of propositional logic.
- Written as p, q, r, \dots
- They are placeholders for propositions.
- **Example:**
 $p =$ "The fridge is empty."

© THE UNIVERSITY OF WAIKATO · TE WHARE WANANGA O WAIKATO · COMP340-08B Lecture 1 · Slide 19

Some Formulas

$$\neg\neg\neg p$$

$$(p \wedge \wedge q)$$

$$(((p \wedge q) \oplus r) \wedge s)$$

$$((p \wedge q) \rightarrow (q \wedge p))$$

$$(p \wedge ((q \leftrightarrow r) \wedge \neg p))$$

© THE UNIVERSITY OF WAIKATO · TE WHARE WANANGA O WAIKATO · COMP340-08B Lecture 1 · Slide 22

Truth Values

Every propositional variable has a **truth value** attached to it, which is either

- **T** – true, or
- **F** – false.

Example:

$p =$ "The fridge is empty."

- If the fridge is empty then p has value **T**.
- Otherwise p has value **F**.

© THE UNIVERSITY OF WAIKATO · TE WHARE WANANGA O WAIKATO · COMP340-08B Lecture 1 · Slide 20

Evaluating Formulas

If we know the truth value of each basic proposition, we can already determine the truth value of a formula automatically!

Example:

"Hamilton is south of Auckland." and "Auckland is east of Sydney."

© THE UNIVERSITY OF WAIKATO · TE WHARE WANANGA O WAIKATO · COMP340-08B Lecture 1 · Slide 23

Constructing Formulas

- Building complex propositions from simpler ones:
 - Propositional variables are joined together using **logical connectives**.
- The complex propositions are called **formulas** (or **sentences**).

© THE UNIVERSITY OF WAIKATO · TE WHARE WANANGA O WAIKATO · COMP340-08B Lecture 1 · Slide 21

Truth Tables of the Connectives

p	q	$\neg p$	$p \wedge q$	$p \vee q$	$p \rightarrow q$	$p \leftrightarrow q$	$p \oplus q$
F	F						
F	T						
T	F						
T	T
