

AlphaServer 1000 to AlphaServer 1000A Upgrade Option — Customer Notice

EK-ALPHA-RN. A01

February 1996

Dear Customer,

Thank you for your purchase of the AlphaServer 1000A Upgrade Option. This unit will allow you to transfer the memory, hard disk drives, CD-ROM and other options from your AlphaServer 1000. The resulting system will be an AlphaServer 1000A with a fast wide SCSI controller and an increased number of PCI slots (three primary and four on secondary bridge).

Table 1: Your upgrade option will include the following parts:

Description	CPU	System Module	Power Supply	Customer Documentation Kit	64 Mb ECC SIMM
PB73U-XA/XB	54-23297-03 (233 Mhz)	54-23499-01	30-43120-02	QZ-00UAA-GW	54-23170-LA
PB74U-XA/XB	54-23297-04 (266 Mhz)	54-23499-01	30-43120-02	QZ-00UAA-GW	54-23170-LA

Please note the Software Revision you are running on the AlphaServer 1000 and compare with the Minimum Software Revisions required to install the AlphaServer 1000A Upgrade Option, which are listed in Table 2.

Table 2: Minimum Software Revisions

Software	Minimum Acceptable Revision Required	MCD/License Package Part Number
Windows NT Server	V3.51	QB-23CAA-SC (QB-23C8A-SA, International)
UNIX	V3.2d-2	QL-MT4AE-6R
OVMS	V6.2-1H2	QL-MT1AE-6R

If your software revision is lower than those listed in Table 2, you must order new software to run AlphaServer 1000A and install on completed system.

If your software revision is at the current level listed or higher, then it is compatible with the AlphaServer 1000A.

Please refer the *AlphaServer 1000 Owner's Guide - (EK-DTSLV-OG)* for information on installation, removal and replacement procedures.
